

or conditions in which social pressure may be operative are more likely to be associated with inferiority feeling.

Dr. H. L. ANSBACHER.

\*\*\*\*\*

Mr. Paul THATCHER writes: "It may interest you to know that our group in Ogden has arranged with the local public library to purchase and install upon its shelves most of the works on Individual Psychology now in English print.

"When school starts next fall it is planned that we shall mail to every school teacher and social worker in Ogden a list of the titles and a recommendation that the books be used.

"The librarian has suggested a series of lectures by the writer in connection with this project, but pressure of work and the U.S. Selective Service are too uncertain to permit definite plans."

Dr. Lydia SICHER reported to us about her work in Los Angeles. She seems to be quite active and apparently very successful. She mentions in her last letter some of her activities as:

Lectures in Los Angeles for the Rehabilitation Program for the Red Cross, and for the Association of Occupational Therapists. The high point of her work seems to be a course for physicians in which a great number participate, some of them very prominent. This course has been received with great enthusiasm, reports indicate.

Besides that, Dr. Sicher has extended her activities to Bakerfield, California. There she gave the inaugural address at the occasion of the opening of a new school for crippled children; she also held some conferences with Public health officials, with the staff of the Association for Spastic Children, and with officers of an army camp nearby.

We all can be very proud of the work that Dr. Sicher has been doing. In serving the public in California she serves all of us. Congratulations, Lydia, and much luck!

## CHICAGO GROUP

The following meetings were held during the year 1942 - 43: 7 general meetings; 7 educational meetings; 4 meetings of the central group members; one social meeting of central group- and associate members; the administrative committee held a meeting once per month.

Because of the war-time demands upon the time and energies of so many of our members, it was decided at the beginning of the year's activities that the number of Central Group member meetings be limited to one every three months, but that the Administrative Committee meet as often as necessary in order to transact needed business items.

The topics offered for discussion at our regular and educational meetings have been very stimulating, and attendance at all meetings has been larger than we had expected through such a busy winter. Subjects covered were:

Psychological Preparation for Democracy  
Psychology of Racial Prejudice  
Principles of Cooperation  
Adolescents in a Time of War  
How Teachers can use Psychology  
Psychological Principles in Handling the  
    Preschool Child  
The Structure of Neurosis  
Children's Dreams and Fantasies

A fall introductory class was held with approximately 15 enrolled; a spring introductory class was held with approximately 23 enrolled. A tentative enrollment is now on file of about 15 in number for a fall advanced class.

During the year the meeting place of our Association was changed from its club rooms at 612 North Michigan Avenue, to 24 North Wabash Avenue. - The membership as of June 18, 1943 is: 27 Central Members, 19 Associate Members, 11 Inactive Central Members, 16 Out-of-town Members, 1 Life Member.
